

"We discover, develop and deliver molecular medicines to cure disease."

Targeted Genetics Corporation is a Seattle-based biotechnology company developing gene therapy products for the treatment of acquired and inherited diseases. We are adding motivated professionals to capitalize on our leadership position in the field:

SENIOR ACCOUNTANT

This key member of the finance team will be responsible for all general ledger accounting functions including overseeing fixed assets and managing the monthly close process. In addition, this position will have a significant role in supporting SEC filings, board presentations, budgeting and forecasting, management reporting, the annual audit and compliance with Sarbanes Oxley requirements.

This position requires a self-motivated individual who can help refine processes and controls while becoming an integral member of our team.

Responsibilities may include:

- Serving as the lead for all general ledger functions, including the monthly close process and preparing and/or reviewing journal entries and account reconciliations;
- Assisting in the preparation of financial statements and footnotes to support the company's SEC filings;
- Overseeing the company's fixed asset system and process;
- Monitoring and improving certain key internal controls;
- Preparing reports and analysis to support internal management reporting;
- Preparing schedules for quarterly reviews and the annual audit;
- Completing various annual government surveys and filings;
- Assisting in the review and monitoring of technical accounting issues associated with Targeted's collaborations, contracts, alliances, and partnerships;
- Assisting with analyzing and implementing new accounting regulations and continued review of company's accounting practices to maintain compliance with GAAP;
- Supporting the budgeting and forecasting processes.

The successful candidate must have:

- Bachelors degree in Accounting
- 3-5 years experience including at least 2 years working for or auditing publicly traded companies
- A thorough understanding of GAAP and a solid understanding of SEC rules
- CPA and background in a high-tech company preferred
- Strong analytical skills; strong written, interpersonal and communication skills
- An aptitude for process review and improvement
- A demonstrated computer proficiency using Windows, Microsoft Office and accounting software
